Project Design Phase-I Proposed Solution Template

Date	20 October 2022	
Team ID	PNT2022TMID40834	
Project Name	Project – IoT Based Smart Crop Protection System for Agriculture	
Maximum Marks	2 Marks	

Proposed Solution Template:

 $\label{project} \mbox{Project team shall fill the following information in proposed solution template.}$

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Usually crops in the fields are protected against birds and other unknown disturbances by humans. This takes an enormous amount of time. Creating a smart automatic system will benefit the farmers in many Different ways.
2.	Idea / Solution description	Smart Farming has enabled farmers to reduce waste and enhance productivity with the help of sensors (light, humidity, temperature, soil moisture, etc).
3.	Novelty / Uniqueness	Role of SENSORS: IOT smart agriculture products are designed to help monitor crop fields using sensors and by automating irrigation systems. As a result, farmers and associated brands can easily monitor thefield conditions from anywhere without any hassle.
4.	Social Impact / Customer Satisfaction	Water conservation. Saves lot of time. Increased quality of production. Real time data and productioninsight. Remote monitoring.
5.	Business Model (Revenue Model)	24.3 2018 2019 2020 2021 2022 2023 2024 2025 2026 2027 2028
6.	Scalability of the Solution	Scalability in smart farming refers to the adaptability of a system to increase the capacity, the number of technology devices such as sensors and fluctuates.
